20-year contract signed for photovoltaic panels

Overview

What should I know before signing a solar energy contract?

Pay special attention to any language that connects you with the installation company, and outlines what you can expect the company to do for you. This guide is designed to provide a clear walkthrough of what you should know before signing a rooftop solar energy contract. [What Is a Solar Power Contract?](#)

.

Should homeowners pay for solar panels upfront?

Homeowners who pay for their panels upfront with cash, or through a solar loan, will see something different than someone who signs a solar lease or solar power purchase agreement (PPA). While solar contracts will differ by provider and project, most of them contain a certain amount of shared verbiage and content.

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. [What is a solar lease?](#)

.

Should you buy or lease a solar panel?

Choosing the right solar panel financing option will make going solar more affordable and extend your long-term benefits. A solar lease can help you avoid hefty upfront installation costs and enable you to benefit from energy savings sooner. However, it can also negatively impact solar incentive savings and home value.

What happens if I don't sign a solar panel contract?

Waivers: You give up your right to claim something with a waiver. Check your contract to ensure there aren't any waivers you don't agree with. If there are, you should try to amend the contract before you sign, or refuse to sign the contract. **Termination:** This section outlines all the reasons you can legally terminate your solar panel contract.

What is the difference between a solar lease and a PPA?

These two financing options are very similar. The critical difference is that with a solar lease, you'll have a fixed monthly payment, whereas with a solar PPA, you'll purchase the power generated by your system at a fixed price per kilowatt-hour (kWh). What does that mean for you?
