Cellular: The future of the smart grid

Cellular companies are also better positioned to support the mass data coming from meters and switches. If every water, gas and electric meter in the U.S. (about 300 million meters) transmitted a day's worth of its 15-minute interval data, it would amount to an increase of less than 2/1000th of 1 percent (specifically 0.00018 percent) in the amount of data that a ...
