7 kw battery Cook Islands

Overview

Renewable energy in the is primarily provided by and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its and reduce , with an initial goal of reaching 50% renewable electricity by 2015, and 100% by 2020. The programme has been assisted by.

Will the Cook Islands use renewable electricity?

The Cook Islands will be careful in its selection of renewable electricity options and will not entertain unproven or non-commercial technologies. The attached Summary Table provides some indicative and preliminary information on the types and costs of the renewable electricity technologies we are considering.

Why is energy important in the Cook Islands?

Energy is a fundamental prerequisite to the sustainable socio-economic development of a nation. As such, the Cook Islands Government considers that environmental protection, energy security and economic growth are inseparable key pillars of our country's development.

What changes will the Cook Islands make?

The changes will include management of power utilities, environmentally friendly and cost effective renewable electricity sources, and energy efficient strategies. The Cook Islands will be careful in its selection of renewable electricity options and will not entertain unproven or non-commercial technologies.

Can a partner help the Cook Islands achieve its targets?

The Cook Islands is looking for partners who can help achieve its targets through funding the conversion of one or more of the islands from diesel generation to renewable energy. We acknowledge the support we have already received from our partners.

What makes the Cook Islands unique?

As a small island developing state, the Cook Islands has unique attributes that considerably enhance the benefits to be gained from renewable electricity. Located in the South Pacific Ocean, the Cook Islands is sandwiched between Tonga to the west, Kiribati to the north and French Polynesia to the east.

Why is pricing important in the Cook Islands?

Pricing is a key tool for influencing consumer behaviour. An appropriate price needs to be set that encourages energy efficient behaviour and reduces the costs to the Government, whilst also achieving its vision of reducing the costs of living and business for residents and attracting Cook Islands people to live and invest in their homeland.

COOK ISLANDS RENEWABLE ENERGY SECTOR PROJECT ...

The Government of the Cook Islands (GCI) has a policy of 100% renewable energy by 2020. The implementation of this plan is well underway, with renewable energy systems installed at half of the inhabited islands (the Northern Group) in 2014-15, and systems for most of the Southern Group planned for installation in 2016-17.

Flatpack2 24V/48kW DC power system

The combination of cost-effective design, power density and reliability makes the Flatpack2 24V 48 kW a product family that truly stands out and provides unparalleled availability. The versatility of the Flatpack2 rectifier means that it can be used in a wide variety of 24 VDC marine applications across the globe.

The Best Islands to Visit in the Cook Islands [2024]

Atiu, Rarotonga and Aitutaki are by far the most visited islands in the Cook Islands. The other islands don't even come close. But that's exactly why travellers do decide to explore the lesser-visited islands of the Cooks; to experience something more adventurous, less crowded and perhaps a little more authentic. A first go-to for such an occasion would be the ...
