

European Solar and Energy Storage Solutions

Albania space solar ltd

Overview

Can Albania build a solar power plant in the Balkans?

The Albanian Ministry of Infrastructure and Energy received four new applications regarding the issuance of permits to construct solar power plants in the Balkan country. The three proposed solar farms will have less than 2 MW installed capacity, allowing energy project initiators to benefit from government support measures.

How much solar capacity does Albania have?

The company currently has 1.1GW of wind capacity in operation, compared to just 8.5MW of solar capacity. Albania, meanwhile, has sought to expand its solar sector in recent years, launching its fifth round of auctions for new PV capacity in January of this year.

Will Albania become a regional leader in solar energy?

Several solar energy projects are currently underway in Albania, with a total capacity of 570 megawatts when completed. The Prime Minister of the Balkan country, Edi Rama, said in October 2021 that Albania will become a regional leader in the production of electricity using renewable energy sources.

Will Albania expand its solar sector?

Albania, meanwhile, has sought to expand its solar sector in recent years, launching its fifth round of auctions for new PV capacity in January of this year. Bids were placed for 355.9MW of capacity, and the ministry of infrastructure and energy awarded contracts to eight consortia for 300MW of capacity.

What is Albania's energy mix?

According to the International Energy Agency (IEA), Albania's energy mix remains heavily reliant on hydropower, which accounted for 97.7% of electricity generation in 2022, while solar PV accounted for the remaining 2.3%.

How has the energy crisis impacted Albania?

The energy crisis that erupted after the events in Ukraine in the spring of 2022 forced governments across Europe, including the Albanian leadership, to focus on diversifying the energy mix.

Home

Photovoltaic Park "Project Blue" represents a milestone in the history of energy production in Albania. It is the largest privately owned photovoltaic project in the region that does not depend on government subsidies. With a planned installed capacity of 100 MW (AC), it consists of two separate sites with 50 MW (AC) capacity each.
