Antora battery Sint Maarten

1075KWHH ESS

Overview

What is Antora thermal battery?

Antora's thermal battery turns cheap, clean energy into the standard that powers global industry. Charges with surplus clean electricity to deliver cost-effective, zero-emission energy at a predictable price. Multi-day storage delivers always-on heat and power for industrial operations where downtime is not an option.

Is Antora a lithium ion battery?

Antora's battery is 3x energy dense compared to lithium-ion batteries. Antora's first commercial-scale thermal battery at Wellhead Electric Company in Fresno, California reached the highest temperature achieved to date for a thermal battery at full scale—1,800°C.

What is Antora energy?

Antora Energy is unlocking zero-emissions industrial heat and power, cheaper than fossil fuels. Antora's thermal battery uses renewable electricity to heat blocks of solid carbon—a low-cost, earth-abundant, and safe storage medium that's used extensively across industries—to glowing-hot temperatures.

How will Antora's batteries impact the energy industry?

Traditionally, fossil fuels have been the cheapest way to power industry, making it the largest greenhouse gas-emitting sector in the country. With Antora's batteries, factories could run on low-cost renewable energy 24/7 without relying on cost-prohibitive, critical material intensive lithium-ion batteries.

When will Antora batteries be made?

Manufacturing will kick off in 2024, and large-scale deployment of Antora's batteries will begin in 2025. Antora's project has received \$7.9 million in ARPA-E support and the company has raised a total of \$230 million in funding from

Decarbonization Partners, Breakthrough Energy Ventures, Lowercarbon Capital, and other investors.

Can Antora batteries withstand high temperatures?

Solid carbon can withstand extremely high temperatures, meaning Antora's carbon block-based batteries can supply heat at temperatures high enough to calcinate limestone or melt steel. Traditionally, fossil fuels have been the cheapest way to power industry, making it the largest greenhouse gas-emitting sector in the country.

Thermal energy storage startup Antora raises US\$150 million for

US\$150 million has been raised in a Series B by Antora Energy, a US-based startup with a novel 'thermal battery' technology claimed to be suitable for decarbonising industrial processes. The company's product delivers heat stored in blocks of carbon material, but it can also deliver electrical power using a patented 'thermophotovoltaic

MIT alumnus' thermal battery helps industry eliminate fossil fuels

Antora Energy has developed a low-cost, highly efficient thermal battery that stores electricity produced by wind and solar generators as heat, allowing manufacturers and other energy-hungry businesses to eliminate their use of fossil fuels. Above: Antora installs its first commercial-scale unit at an industrial site near Fresno, California.

ARPA-E Disruptors: Antora Energy

Antora Energy developed a revolutionary way to

decarbonize heavy industry using thermal batteries that are 3x more energy dense than lithium-ion batteries. Antora's battery stores energy in a stack of commercially available carbon blocks in an insulated box. These blocks are heated until they glow like a toaster.

Antora - Antora Energy Raises \$150 Million to Slash Industrial

To learn more about Antora Energy, visit and follow the company on LinkedIn and Twitter. About Antora Energy . Antora Energy is unlocking zero-emissions industrial heat and power, cheaper than fossil fuels. Antora's thermal batteries convert low-cost, intermittent renewable electricity into reliable industrial energy.

BlackRock, Temasek-led group invest \$150 mln in thermal battery ...

Thermal battery maker Antora Energy on Thursday said it has raised \$150 million in a funding round led by a tie-up between the world's biggest asset manager BlackRock and Singapore state
