# Austria solar city houses

## Overview

---

The adjacent washlands were assigned a protected natural function (as a Natura 2000 area) to accommodate the concerns of environmental conservationists. As such, the mission for the landscape architect was to use the design for the residential areas to ensure that the natural values of the protected areas would not be.

As a pilot project, a decentralised water purification system has been set up for 88 homes and a primary school. That system serves as a research facility for studying the various aspects of.

The decision to hire famous designers and to issue competitions for architecture, energy and water concepts has resulted in a district with an.

The solarCity is an energy-saving living district in -Pichling, , which provides living space for about 4,000 people. The houses were built using a low-energy design. The idea and motivation for providing energy efficient living arrangements stems from the fact that fossil fuels contribute to global warming and that their use should therefore be avoided. Planning of the project began i.

The solarCity is an energy-saving living district in Linz -Pichling, Austria, which provides living space for about 4,000 people. The houses were built using a low-energy design. Is Linz a solar city?

In building the solarCity, which was subsidized by the EU and the province of Upper Austria and designed by internationally recognized architects, the Provincial Capital of Linz has realized an urban development project that has attracted a great deal of notice.

What is Solar City?

Ultimately, it was decided from the earliest inception that a project should be realised of a high architectural and ecological quality and value. At the beginning of the third millennium, Solar City is Austria's largest urban development project.

Will SolarCity become a model for urban development in the 21st century?

The joint determination of objectives and specification of plans, as well as the institution of a central project management team, guaranteed the successful realization of the project. As a result of its integrated approach, chances are high that the solarCity will become a model for urban development in the 21st century.

## Austria solar city houses

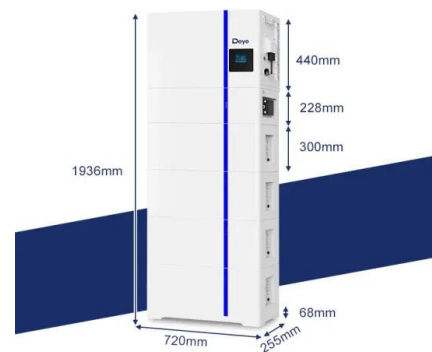

### The concept of ecocities and solarCity Linz, Austria, as

Austria, introduced a policy of low-energy social housing. At that time 12,000 people were looking for homes in the Linz area. Simultaneously awareness was increasing that high consumption of fossil energy was a significant contributor to the green-house effect. Both facts provided decisive arguments for an ecological and sustainable housing

### Solar City. In Austria la città del sole e dell'utopia.

Vivace, colorata, e soprattutto, chi l'avrebbe mai detto, solare, oggi Solar City è in grado di ospitare ben 25.000 persone anche se al momento ad abitarvi sono solo in 3.500 circa. Ma passiamo ora agli aspetti più pratici e ...
