Automatically folding solar photovoltaic panels

Overview

Smartflower is the innovative sculptural solar flower with advanced photovoltaic solar panels that open and close to cleaning itself for maximum efficiency.

Smartflower is the innovative sculptural solar flower with advanced photovoltaic solar panels that open and close to cleaning itself for maximum efficiency.

SmartFlower uses advanced robotics and automation to intelligently track the sun, making up to 40% more energy than traditional stationary solar panels. In addition, every day at sunset, Smartflower will automatically fold up and clean itself to maintain peak solar utilization.

The SmartFlower is a unique intelligent solar panel system that tracks the sun throughout the day to create the most amount of power. When there's high-winds.

SmartFlower Solar produces unique, ground-mounted solar panel systems that include a sun tracker and a number of other high-tech features. This 'smart' solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop panels .

The EcoFlow Solar Tracker solves this with a self-powered, motorized robotic arm that keeps your solar panels at a perfect 90-degree angle to the sun. Its sensor locks onto the sun.
