# Belgium solar panel system house

## Overview

---

How do solar panels work in Belgium?

In Belgium there are two main types of solar panels. Solar Thermal Panels: these harness the sun's heat to produce hot water and heat homes. Equipped with sensors capturing up to 90% of sunlight, these panels transport heat to a water tank for storage, ensuring a continuous supply of hot water, even on overcast days.

How many solar panel installers are there in Belgium?

Belgian solar panel installers – showing companies in Belgium that undertake solar panel installation, including rooftop and standalone solar systems. 684 installers based in Belgium are listed below.

Are solar panels a good investment in Belgium?

As soon as you install your solar panels, you'll notice a reduction in your electricity bill. Today, photovoltaics is an affordable investment for all Belgian households. The price of panels has fallen sharply over time (divided by 6 in 10 years!).

Are solar panels free in Brussels?

You can also have solar panels installed free of charge, thanks to third-party investors, an initiative that makes solar panel installation even more accessible and affordable for everyone. No power?

Everything you need to know about installing solar panels on the roof of your home or business in the Brussels region.

How long do solar panels last in Brussels?

Private individuals in Brussels installing photovoltaic panels receive green certificates for ten years. The system adjusts rates annually to ensure a return on investment within seven years. Solar panel regulations vary regionally.

How much do solar panels cost in Flanders?

The cost of solar panels has decreased in recent years, making them more accessible. Currently, a 5,000 Wp installation costs around €6,000 including VAT. Government subsidies for solar panel installations are gradually phasing out. In Flanders, the maximum subsidy for 2024 is €375, down from €750.

### End of the compensation scheme for your solar panels

A number of changes have been brought in since 1 January 2020, causing great confusion among owners of photovoltaic panels. The end of the compensation scheme for the consumption/feed-in of self-produced energy is now effective in the Brussels Region parallel, the number of green certificates granted to prosumers is expected to fall.

### DELEX Belgium

Photovoltaic Panels. Are you looking for the ideal solution to control your energy bill, reduce your ecological footprint or make your home more profitable? Invest in a photovoltaic system! It's the first step towards the energy transition and allows you to control all or part of your electricity bill.

### Home Energy Storage (Stackble system)

-   
High Efficiency
-   
Easy Installation
-   
Safe and Reliable
-   
Perfect Compatibility

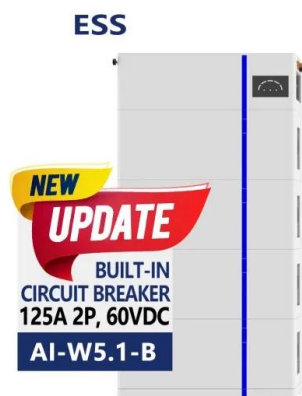

- Product Introduction**
-  Scalable from 10kWh to 50kWh
  -  Self-Consumption Optimization
  -  Integrated with inverter to avoid the compatibility problem
  -  LFP battery, safest and long cycle life
  -  Backdoor design, effortless installation
  -  Capable of High-Powered
  -  Emergency-Backup and Off-Grid Function
