Energy in Bermuda

Historically like other modern developed

countries around the world, Bermuda has depended on fossil fuel for energy production for electricity, heating, cooling and transportation. Due to this dependence on external resources for energy, security of supply and production of energy have always been subjects of interest by both government and non-government entities.

A Sustainable Energy Future for Bermuda , BELCO

While we analyse the options for economical, large-scale, renewable power, we are laying the foundation to support Bermuda's transition, which includes retiring old engines; making internal practices and efficiencies more sustainable; moving to an entirely electric commercial fleet; upgrading our transmission and distribution network and

Transforming Energy

Going forward, our focus is on transitioning Bermuda to a sustainable energy future through the use of battery energy storage systems; offsetting emissions; energy efficiency measures; the introduction of more renewable energy sources to our energy mix; and upgrading our transmission and distribution infrastructure to accommodate the

Seabased signs site deal for 40-MW wave energy project in Bermuda

Wave energy company Seabased on Tuesday said it has signed an agreement with the Bermuda government to advance on the

development of a 40-MW commercial ocean wave power park. Once completed, the project would feed into the island's grid and meet about 10% of Bermuda's energy demand.
