Bolivia smart grid roadmap

Overview

What is a smart grid roadmap?

This roadmap provides a consensus view from more than 200 government, industry, academia and consumer representatives on the current status of smart grid technologies, and it charts a course for expanding their use from today to 2050.

What should be included in a smart grid roadmap?

This roadmap provides some insights into the benefits and possible regional pathways for smart grids deployment, but more analysis is needed, particularly of the generation side, to provide a more complete picture of system performance. Additional regional examination is also needed to consider specific system attributes.

How many standards are included in a smart grid/smart energy roadmap?

references to known Smart Grid/Smart Energy roadmaps provided by some regional bodies. In total, this document identifies over 500 relevant standards/specifications and/or standard parts for the considered domain. Five electrotechnical domains, nineteen specific systems and nine cross-cutting topics have been analysed. Purpose of the document

Pathway to a fully sustainable energy system for Bolivia across ...

Furthermore, large-scale development of solar PV, particularly in off-grid communities, can serve to reduce energy poverty in Bolivia (Sovacool, 2012). These results also highlight the need for smart policy making to promote the development and investment in renewable technologies, many of which are lacking in Bolivia according to Washburn and

Renewable Energy in Bolivia: On the Road to Sustainability

Bolivia continues to make efforts to upgrade the infrastructure needed for renewable energy production. The National Interconnected System (SIN), which the government has put in place, aims to improve the nation's capacity for producing electricity by building additional power plants, transmission lines and substations.

Bolivia

A quarter of the electricity generated in Bolivia comes from renewables. On the other hand, 12% of the population still does not have access to electricity. The government has launched the Bolivia Electric Plan 2020-2025 to support the expansion of the electricity grid with a strong emphasis on renewables.

IEEE Vision for Smart Grid Controls: 2030 and Beyond

The roadmaps parent document, IEEE Vision for Smart Grid Controls: 2030 and Beyond, discusses many topics that outline the evolution of the Smart Grid and the opportunities and challenges that it presents for control, ranging from generators to consumers, from planning to real-time operation, from current practice to scenarios in 2050 in the
