How much does energy cost in Bonaire?

This profile provides a snapshot of the energy landscape of Bonaire, a special municipality of the Kingdom of the Netherlands located on the coast of Venezuela. Bonaire's utility rates are approximately \$0.35 per kilowatt-hour (kWh), above the Caribbean regional average of \$0.33/kWh.

Does Bonaire have a regulated electricity sector?

In recent years, the Ministry of Economic Affairs in the Netherlands has been active in reforming the regulation of the electricity sector in Bonaire, both in terms of utility regulation and expanding generator access.<sup>13</sup>

Are membrane-free batteries cyclable?

While membrane-free batteries have been successfully demonstrated in static batteries, membrane-free batteries in authentic flow modes with high energy capacity and high cyclability are rarely reported. Here, we present a biphasic flow battery with high capacity employing organic compound in organic phase and zinc in aqueous phase.

Can membrane-free flow batteries be used for energy storage?

The power density of the membrane-free RFBs can be further improved by decreasing the distance between electrodes and increasing the ionic conductivity of electrolytes. This work opens a new avenue of using membrane-free flow batteries for affordable large-scale energy storage.

Who regulates Bonaire?

As a special municipality of the Kingdom of the Netherlands, Bonaire is largely regulated by ministries of the Netherlands' national government.

Are membrane-free Zn/phenothiazine batteries based on biphasic electrolytes?

Chai et al. also demonstrated a membrane-free Zn/phenothiazine battery based on biphasic electrolytes . Despite the delicate design, most of the reported membrane-free batteries only operate under static conditions with limited scalability, and the membrane-free flow battery is rarely demonstrated [25, 52, 56].
