Is Botswana a good country for solar energy?

Botswana is rich in natural resources and has vast solar energy potential, receiving more than 3,200 hours of sunshine per year. The country's Vision 2036 calls for 50% renewable energy allocation by 2036.

Does Botswana need a 40% shareholding for solar power?

For utility scale grid-connected solar plants, which include Mmadinare and Jwaneng, Masisi said a mandatory requirement of 40% shareholding by citizen owned companies was provided. Botswana is rich in natural resources and has vast solar energy potential, receiving more than 3,200 hours of sunshine per year.

How much solar energy does Botswana produce a year?

An estimated 1300 million GWh of solar energy falls on the entire Botswana annually, with an average daily irradiation on a horizontal surface of 21 MJm<sup>-2</sup> [ 32 ]. The number of sunny days range from 280 to 330 annually [ 33 ], and on average, 3300 sunshine hours are recorded each year [ 34 ].

Will a grid-connected solar project help Botswana meet its electricity demand?

Botswana has launched its first utility scale grid-connected solar project which is expected to help the country meet its electricity demand. Botswana has launched the first phase of a solar project expected to be delivered by next year.

What does vision 2036 mean for Botswana?

The country's Vision 2036 calls for 50% renewable energy allocation by 2036. In August 2022, Scatec and the Botswana Power Corporation (BPC) signed a binding 25-year power purchase agreement (PPA) for the construction of a solar PV facility in the Mmadinare District. The estimated total capital expenditure for the project is \$104 million.

What does the European Union do for Botswana?

The European Union focuses on two priority areas of cooperation – green transformation and economic diversification and jobs. Green Transformation EU support will focus on assisting the Government of Botswana to address 3 areas of action under this priority:
