Installing solar panels yourself is possible, but it is not easy. In addition, there are not nearly as many options when it comes to home solar kits as there are when you go through solar installers. There is a good deal of labor involved in solar panel installation and multiple people will likely need to be involved.

Why do homeowners choose to self-install solar panels?

The number one reason homeowners choose to self-install solar panels is the cost. Everyone wants to save money on solar. Solar panel installation costs account for about 10% of the overall cost of a residential solar system before tax incentives. Of course, this doesn't include money for tools or the value of the time spent installing.

How do I choose a solar system for my home?

This means figuring out your energy consumption, deciding which panels you need, and determining how many solar panels it'll take to produce enough electricity to power your home. Once that's done, you'll purchase your solar equipment. This includes panels, inverters, racking, and installation tools.

Can I build my own solar panels?

Yes, it's possible and a number of people do install solar systems themselves, however it requires a significant amount of technical understanding of electrical systems. Installation by a certified professional may be required by certain warranties, insurance policies or local rules and regulations. Is it cheaper to build your own solar panels?

.

Are You Up to the task of installing a 'turnkey' solar system?

If you think you might be up to the task as well, here are some important things to consider. A June 2023 report by consulting firm Wood Mackenzie reveals nearly half of the cost of an installed "turnkey" solar system goes to the installer's overhead, customer acquisition costs and labor. Labor is actually the least of those three categories.

Can You DIY solar panels?

Yes, you can. Home solar kits are available with all the parts you need. You'll likely need to purchase additional tools and equipment to get the job done, though. You'll also want to get some people to help you if you plan on installing solar panels yourself. 2. Does DIY Actually Save You Money?
