

European Solar and Energy Storage Solutions

Charge storage Aruba

Overview

What is Aruba cloud object storage?

Aruba Cloud Object Storage is the ideal solution for cloud archiving: reliable, flexible and with transparent pricing, for the storage of petabyte of non-structured data. Our service is S3 compatible, offers maximum redundancy thanks to triple replication on separate disks and allows users to choose where their data is geographically stored.

Where can I store my data with Aruba?

Only Cloud services can be hosted in our European network of data centers, as well as in Italy. But you and you alone will be able to choose where your Cloud infrastructure is based. The data you store with Aruba is completely under your control. We guarantee that we will not access nor use the data that you put in our infrastructure.

How secure is Aruba cloud?

Data security is guaranteed at login thanks to ACL (Access Control List) rules, during transmission by HTTPS and FTPS protocols and by Object Lock encrypted storage. Keep full control of your data, choosing to store them in one of the 7 data centers of the international Aruba Cloud network.

What is Aruba drive?

Aruba Drive offers a range of useful tools for improving productivity and shared working. The perfect solution for storing and digitizing all your files, accessible from any device. A storage space synched with your mobile apps, with integrated tools for organizing tasks and projects.

How does Aruba drive work?

With Aruba Drive linked to a domain, get a web address to use to access your platform. This way you can take advantage of having a drive for your domain complete with 5 mailboxes, as part of your brand image. To watch the video,

Charge storage Aruba

External storage

You can provide virtually unlimited storage capacity by adding user-supplied external storage volumes. Supported volume types and storage protocols include: NFSv3, NFSv4, and SCP (sshfs). One application of external storage is the saving and restoring of DHCP lease files over SCP or NFS network attached storage systems.

Cloud Object Storage

Cloud Object Storage is the service that allows you to save large quantities of information easily, automatically creating multiple copies distributed across multiple storage nodes. Thanks to its ability to manage hardware failures automatically and immediately, data protection is ...

General description of the Aruba Object Storage service

The Aruba Object Storage service is based on the IaaS (Infrastructure as a Service) model and allows you to store and archive all the data that you want without capacity limitations in total safety. Object Storage is API S3 compatible and can be used through common connection clients.
