City Skyline Solar Power Plant

Overview

The solar power plant is a power-generating structure capable of generating 160 megawatts during the day and 112 megawatts during the night. It is unlocked by meeting the Grand City.

How do you produce electricity in Cities Skylines?

Cities Skylines offers different methods to produce electricity. At the start of the game you will only have access to the Wind Turbine and Coal Power Plant. The further you progress the more you unlock! You can construct water based Wind Turbine's, Oil power plants, Solar Power plants and even nuclear power plants.

What is a skylines solar power plant?

This article is a stub. You can help Skylines Wiki by expanding it . The model is based of concentrated solar power plants with solar towers. Which use mirrors and a tank of (typically) molten salt to catch and store heat energy. The description however, describes a completely different type of solar power plant.

Does Green Cities DLC produce electricity?

The Ultimate Recycling Plant from the Green Cities DLC also produces some electricity, but the amount is not really significant by the time a player is able to construct one. The same is true for the Waste Processing Complex in the Sunset Harbor DLC. Buildings support a power grid around them.

Is a solar power plant a good investment?

In terms of noise pollution, the Solar plant is best, followed by a tie between Nuclear, Oil, Coal, and the Incineration Plant. Hydro is a bit of a wildcard as the cost and upkeep vary wildly. Overall, it's not a reliable bet.
