Congo Republic rubicon solar

Overview

Will Skypower develop a 200MW solar project in the DRC?

SkyPower has signed a joint development agreement with Africa Finance Corporation to develop a 200MW solar project in the DRC.

How many people in DRC have electricity?

According to World Bank data, only about 19 percent of DRC's population had access to electricity in 2019. The project was originally developed by CIGenCo, Greenshare Energy, Greenshare Congo, Volt Renewables, and Nzuri Energy. IFC and Globeleq (as lead developer) have come on board to drive the project forward and help it reach completion.

Will cigenco and nzuri energy build a large-scale solar power plant?

Kinshasa, the Democratic Republic of Congo, November 25, 2021 – To scale up clean energy production capacity in the Democratic Republic of Congo, IFC, Globeleq, CIGenCo, Greenshare Energy, Greenshare Congo, Volt Renewables, and Nzuri Energy have partnered to develop a large-scale solar power production plant in the country.

When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020.

Who owns electricity in Congo?

Less than 10% of Congo's roughly 90 million people have reliable access to electricity. The consortium is led by Gridworks, which is owned and financed by the British development finance institution CDC Group, and includes French utility company Eranove and Spanish power developer AEE Power.

Will a \$100 million solar project power Gemena & Bumba & Isiro?

An international consortium led by Powergrids plans to invest \$100 million in three off-grid solar plants intended to power the cities of Gemena, Bumba, and Isiro, which are located in the country's northern region and currently have no connection to the country's power network.
