Contracting auxiliary materials for photovoltaic panel installation engineering

Overview

Is mechanical design of a PV array within the scope of this document?

Mechanical design of the PV array is not within the scope of this document. BRE digest 489 'Wind loads on roof-based Photovoltaic systems', and BRE Digest 495 'Mechanical Installation of roof-mounted Photovoltaic systems', give guidance in this area.

What are the different types of photovoltaic (PV) applications?

There are many Photovoltaic (PV) applications, including Building Integrated Photovoltaics (BIPV), buildings with weight limitations, buildings with curved roof surfaces, or other outdoor portable applications, where flexible or conformable PV products would be beneficial.

What is the IEA photovoltaic power systems programme?

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCP's within the IEA and was established in 1993. The mission of the programme is to "enhance the international collaborative efforts which facilitate the role of photovoltaic solar energy as a cornerstone in the transition to sustainable energy systems."

What is a roof mounted photovoltaic system guidance?

The guidance refers only to the mechanical installation of roof mounted integrated and stand-off photovoltaic systems; it provides best practice guidance on installation requirements and does not constitute fixing instructions.

What is a PV module?

PV modules are current-limiting devices, which require a non-standard approach when designing fault protection systems, as fuses are not likely to blow under short-circuit conditions. PV systems include d.c. wiring, with which few electrical installers are familiar.

What types of electrical plans are included in a PV system?

Electrical Plans, including single-line electrical diagrams showing utility interconnection and all devices comprising the PV system, including, but not limited to: PV arrays, combiner boxes, circuit breakers, disconnect switches, inverters, meters, timers, control devices, and other equipment comprising the complete system.
