

## European Solar and Energy Storage Solutions

# Cpower energy aps Seychelles

## Overview

---

Who is CPower energy?

“To become a leading service company in the Renewable Energy Sector. Our experience and knowledge are the basis of our performance and the foundation of our future.” CPower Energy Ltd are a successful service and consultancy company, delivering integrated solutions and specialist services with a focus on Offshore Wind, Onshore Wind and Oil & Gas.

When will electricity be produced in the Seychelles?

Electricity production is expected to be highly seasonal with the majority of energy produced in the months of June to September when wind strength and wind probability are highest on the island of Mahe. Project Development The wind farm project was fully funded by the Abu Dhabi government through a \$28 Million grant to the Seychelles.

What is Seychelles' energy policy?

Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated. This 6 MW power plant can produce up to 2% of the Seychelles' power and is located on Mahé Island. It is expected that the wind farm will replace 1.6 million litres of diesel fuel annually.

Who are CPower & Atlas Copco?

With CPower's expertise in planning and execution and Atlas Copco's state-of-the-art equipment and global presence, the pair are set to further develop new solutions as the world hurtles towards Net Zero.

Who funded the Seychelles wind farm project?

The wind farm project was fully funded by the Abu Dhabi government through a \$28 Million grant to the Seychelles. The Abu Dhabi government appointed Masdar as project manager.

## Cpower energy aps Seychelles

### CPower Energy

CPower Energy Ltd are a successful service and consultancy company, delivering integrated solutions and specialist services with a focus on Offshore Wind, Onshore Wind and Oil & Gas. Our UK head office is based at the heart of Europe's Renewable Industry, with subsidiaries in Denmark and Taiwan.

### APS Peak Solutions Program

APS Peak Solutions Program If you are a commercial and industrial energy user in the APS service territory, you could be earning revenue through its Peak Solutions demand response program. The program pays participants for reducing electric energy during the rare times when the grid is stressed from increased demand.

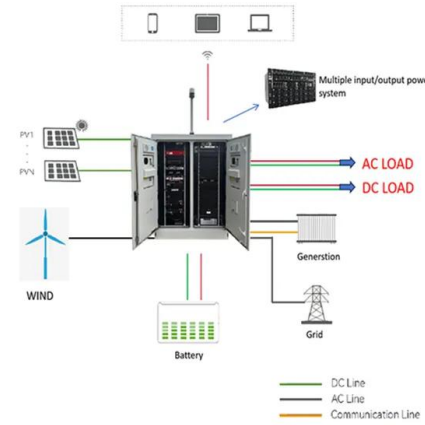

### Who We Are

CPower is the leading, national distributed energy resources monetization and Virtual Power Plant provider, creating the Customer-Powered Grid® that will enable a flexible, clean and dependable energy future. With ~7.0 GW of capacity at ~29,000 sites across the U.S., we unlock the full value of DERs to strengthen the grid when and where

### The Current

Commercial and industrial energy users in

Arizona can earn revenue and reduce costs while helping the people in their communities keep cool amidst sweltering summers. The APS Peak Solutions program available through CPower rewards customers for conserving electricity when the power grid is stressed.

## APS Peak Solutions Program

If you are a commercial and industrial energy user in the APS service territory, you could be earning revenue through its Peak Solutions demand response program. The program pays participants for reducing electric energy during times of high usage on the APS grid. The program is offered through CPower and is a low-to-no-risk,

## Demand Growth Offers Opportunities for Data Centers

Artificial intelligence is accelerating data center growth and energy needs--and facilities can reduce costs and earn revenue by managing

their electricity wisely. Grid planners have nearly doubled their 5-year load growth forecasts on the back of surging data-center demand. In fact, data centers may account for as much as one-third of the anticipated ...

### APS Peak Solutions Program

If you are a commercial and industrial energy user in the APS service territory, you could be earning revenue through its Peak Solutions demand response program. The program pays participants for reducing electric energy during times of high usage on the APS grid.

### Temporary Power

CPower Energy has experience gained from over 15 Offshore Temporary Power projects. Our partnership with Atlas Copco ensures we can deliver turn-key solutions right through from planning to decommissioning, we have the experienced to manage the provision of generator sets, vessels and manpower during any Temporary Power project.

## Our Services

CPower Energy has more than 8 years of experience of finding, choosing and managing CTV's for its own projects and to help others, we have connections across the industry with a variety of CTV supply companies. We understand what it takes and are confident we can supply the most suitable vessel for your needs on a very flexible basis.

## APS Peak Rewards for Education (Webinar)

The APS Peak Solutions demand response program offers schools, colleges, and universities the opportunity to reduce their electrical energy use during periods of high usage during the summer and rewards them with revenue payments. The education sector has the opportunity to help promote clean energy for all and receive financial incentives for ...

## VPPs and Flexible Demand Response: Bitcoin Mining

VPP providers such as CPower Energy are essential partners in the flexible demand response ecosystem for Bitcoin mining. In aggregating distributed energy resources (DERs), such as solar panels, batteries, and flexible loads, that can be dispatched as needed, VPPs provide reliable and scalable demand response services.
