Solar panels cost homeowners an average of \$31,460 but typically ranges from \$27,000–\$32,000 for a 2,000 square foot home. See which factors will impact your total cost. Do solar panels cost a lot?

Solar panel costs vary from state to state, partly due to the area's average electricity bill and solar suitability. For example, Hawaii pays the most for electricity, while Utah pays the least. Those in Hawaii stand to see bigger savings than those in Utah when going solar.

Are solar panels worth it?

Solar panels can generate major savings if you're trying to reduce your electricity costs, carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs, the more a solar panel system will save you in the long run.

How much do Solar shingles cost?

These photovoltaic (PV) materials replace or overlay your current shingles, converting sunlight into electricity. Solar shingles are typically more expensive than standard panels, with costs ranging from \$15,000 to \$20,000 for an average installation, but they offer a more streamlined look and can increase the value of your home.

What is a 'solar panel rate' scam?

This is a common scam used to gather personal data and/or trick people into signing long-term solar lease agreements that are far less favorable than owning solar panels. For example, in February 2023, a Facebook page called “Solar Panel Rate” ran multiple ads claiming Elon Musk was paying homeowners \$2,500 to test out new solar technology.

Can solar panels save money on energy costs?

Yes, homeowners across the US can save money on energy costs by powering their homes with solar panels instead of purchasing electricity from a utility. This is especially true following the rapid rise in grid electricity rates in 2022 and 2023.
