Should you use a wind turbine and a solar panel combination?

Whether you're working to keep your battery bank charged or just to maximize your power production compared to your consumption on a grid-tied system, going with a wind turbine and solar panel combination goes a long way to helping you achieve energy independence. It's also important to understand the difference between weather and climate.

What is integrated wind and solar?

One approach is the integrated wind and solar system, where wind turbines and solar panels are interconnected within a single power generation system. This configuration enables streamlined operation, shared infrastructure, and efficient utilization of grid connections.

Will solar and wind energy lead the growth in US power generation?

Solar and wind energy will lead the growth in U.S. power generation for at least the next two years, according to EIA estimates. This report uses data from the EIA to analyze solar and wind capacity and generation over the past decade (2014 to 2023) in all 50 states and the District of Columbia.

Where do solar and wind power data come from?

All national and state-level data come from the U.S. Energy Information Administration (EIA). Utility-scale solar and wind summer capacity values for 2014-2022 are as reported in EIA's Historical State Data for each year.

Can a wind turbine and solar panel combination reduce downtime?

Having a combination system of wind and solar allows you to reduce your downtime, since often when windspeed is lower, solar output is higher and vice-versa. A wind turbine and solar panel combination is your key to unlocking the potential of your home's renewable power system. Let us show you all about this set-up.

How much wind energy does Texas produce?

Although Texas leads the way in wind power — generating almost three times more than the next biggest wind energy-producing state — electricity generated from wind made up a more modest 22% of the Texas' electricity mix in 2023. Most wind energy in the U.S. is produced onshore, in the middle of the country.
