A Bright Future for Renewable Energy in South Sudan

South Sudan faces significant poverty-related challenges, with more than 82% of the population living in multidimensional poverty. This includes limited access to basic services, such as clean water, health care, education and adequate nutrition. It is also, however, the least electrified. This situation has been exacerbated by ongoing conflicts, economic instability and ...

Sudan's hidden water riches under the desert - DW - 07/03/2023

Sudan has the biggest share of the world's largest fossil water reservoir, the Nubian Sandstone Aquifer System. The water gives life to arid regions, but it must be managed sustainably in order to

ADF donates \$5.5m for Eastern Sahel Desert to Power initiative

The Board of Directors of the African Development Fund has approved a \$5.5 million technical assistance grant to kick-start the roll-

out of the flagship Desert to Power initiative in the Eastern Sahel region countries of Djibouti, Eritrea, Ethiopia and Sudan. The East Africa Regional Energy Project follows on the approval by the Board of

Emergency Cash Assistance Improves the Livelihoods of Desert ...

Climate shocks reduce the resilience of households and communities as it leads to reduced agricultural productivity, water, and energy challenges; this is why our programs are tailor-made to promote climate-conscious agriculture to enhance resilience to these shocks," said Meshack Malo, FAO South Sudan Country Representative.

Assessing the drivers of energy supply and demand in

The countries showed considerable disparities in energy access and consumption patterns. South Sudan records the lowest electricity access level, while Rwanda reports the lowest intensity level. Notably, all West African countries, excluding Ghana, fall below tier 2 in terms of level of access.

Sudan: Energy Country Profile

Sudan: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

African Development Bank Group (AfDB)

The East Africa Regional Energy Project follows on the approval by the Board of Directors of the African Development Fund of the West Africa Regional Energy Project (<https://bit.ly/3xcTlo2>), in July 2021. The Desert to Power program is a flagship renewable energy and economic

development initiative led by the African Development Bank.

This paper focuses on developing planning strategies for the South Sudan electric power system that explicitly consider conflict uncertainty. We model the South Sudan system using an open source energy system optimization model, and incorporate conflict by performing multi-stage

New Report: Renewable Energy and the United

This report explores the potential for renewable energy to support local energy access and peacebuilding in South Sudan, the newest and least electrified country in the world, by leveraging the renewable energy transition of the UN peacekeeping mission (UNMISS) - the single largest generator and consumer of electricity in the country.

Prospects of Renewable Energy in Sudan

Figure 1 below shows the new map of the states of Sudan af-ter secession of the South. Sudan

has lost 60 percent of its biomass energy capacity, 75 percent of its oil reserves, and 25 percent of its hydropower capacity following the July 2011 secession of South Sudan. Owing to the declining stock of energy resources on one side

South Sudan

South Sudan are the lowest in Africa. Local statistics indicate that South Sudan's Electricity Corporation has an installed capacity of 25 MW with approximately 15,000 consumers having access to an electricity network (ROSS, 2014). The World Bank (2015) indicates that only 5.1 per cent of people countrywide have access to electricity, with 3

EAST AFRICA: ADF Provides \$5 Million for Desert

The Desert to Power initiative is expanding to the eastern Sahel. The African Development Bank (AfDB), which initiated the program, announced the release of \$5.5 million in funding for four countries. This is a technical assistance grant that will enable Ethiopia, Djibouti, Sudan and Eritrea to implement this regional program.
