How do I choose a solar removal company?

First, assess your reason for removal. Roof repair, moving homes, or an upgrade are common reasons. Know the why and make a plan. Hire a professional: Solar removal is no DIY gig. Find a trusted company for a seamless experience. Check warranties: Review your solar panel and roof warranties. See if they cover removal costs.

How do you transport solar panels from a rooftop?

This will prevent scratches and damage during transportation. To move the solar panels from your rooftop to a safe location, you'll need a few things: protective covers or blankets for each panel, sturdy straps or ropes to secure them in place on the vehicle (such as a truck), and at least one other person to help with lifting and carrying.

Can you replace a decommissioned solar array?

Putting a new solar array in place of a decommissioned one isn't always a streamlined process. If an owner plans to replace a system, negotiations can carry on for a year or two. But system components can be viable and potentially support a new array without purchasing a new one from the ground up. "We have this skeletal system," Barbosa said.

Can photovoltaic modules be reused or refurbished?

In some cases, photovoltaic modules can be reused or refurbished to extend the system's performance period.⁵ If equipment is still in working order, one possibility is to extend leases, permits, and interconnection agreements to continue operation.
