Solar + storage inaugurated in El Salvador

The solar PV plus storage facility, Capella Solar, has been officially opened providing electricity and power reserve to El Salvador's grid. The Capella Solar operation located in the Usulután department in El Salvador's southeast - about 100km to the southeast of the capital San Salvador - is noteworthy for several reasons. The 140MW

El Salvador to Build First State-Owned Solar Power ...

The Talnique Solar project will require an investment of \$20 million and will have an installed capacity of 17MW at peak hours. The plant will feature 29,600 solar panel modules with bifacial technology, which means that ...

Groupe Agence Française de Développement

The Antares power plant will sell all the power generated to the country's 7 distribution companies, via 7 "administered" power purchase contracts with a 20-year maturity, which were won by Neoen in 2014 following a public bidding

process. This first solar power plant in El Salvador will have an impact on the transfer of technology and

El Salvador Witnesses 160-Fold Increase in Solar Energy Capacity.

According to the Directorate General of Energy, Hydrocarbons, and Mines (DGEHM), during 2023, El Salvador's photovoltaic plants generated approximately 539,067.71 MWh, constituting an impressive 7.13% of the country's energy matrix.

El Salvador to Build First State-Owned Solar Power Plant

The Talnique Solar project will require an investment of \$20 million and will have an installed capacity of 17MW at peak hours. The plant will feature 29,600 solar panel modules with bifacial technology, which means that they will generate power on both sides of the panel. The plant's site covers the equivalent of 19 city blocks.

MPC Energy opens 21 MWp of solar farms in El Salvador

CAESS, the local arm of US power producer AES Corp (NYSE:AES), procured the entire solar energy output under a 20-year USD-denominated power purchase agreement (PPA). Victor

Atehortua, MPCES project manager, told La Prensa Grafica that the company plans to develop some 70 MW of projects to reach 100 MW in El Salvador in the next three years.

INTEGRATED DESIGN

EASY TO TRANSPORT AND INSTALL,
FLEXIBLE DEPLOYMENT

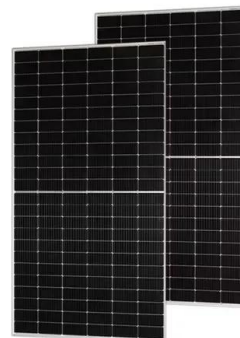

El Salvador

Solar The central region of El Salvador receives a high level of solar radiation (5.3 kWh/m²/day). Therefore photovoltaic systems are an opportunity to take advantage of the country's vast solar resources. Most solar panels are installed in government buildings, schools, and universities. The capacity of the largest photovoltaic system is 99 MW.

El Salvador Illuminates the Future with Talnique, its First State ...

Talnique Solar boasts 29,904 solar panels spread across 19 acres, with an installed capacity of 17 megawatts peak. This substantial output will provide clean energy to over 2 million users on the national grid. Álvarez added that the project not only represents an engineering feat but also a social commitment to future generations.
