### Haiti Builds a Path to a Clean, Resilient Energy Future

About 49% of the population of Haiti had access to electricity as of 2022. In rural areas, that number is closer to 2%, and while 80% of Haiti's urban areas have access to electricity, that access may not be reliable. "Even when a household is connected to the power grid, they might only have power for three to eight hours a day."

### Electricity sector in Haiti

Haiti has limited energy resources: no petroleum or gas resources, small hydroelectricity potential and rapidly declining supplies of wood fuels. With very limited access to electricity, most of the population in Haiti depends on charcoal as a source of energy.

### Solar Electricity Haiti , Hope Health Action

Haiti: Haiti has some of the highest energy costs in the world, and with very few resources and an unreliable power grid, less than 45% of the total population have access to domestic electricity - something most of us would consider a basic necessity. In rural areas, such as the area of our partner hospital, HCBH, fewer than 5% of the

## The Time is Now for a Renewable Energy Transition

...

In Haiti, installed energy capacity is 250-400 megawatts, compared to over 4,000 MW in the Dominican Republic. Currently, Haiti is divided into different isolated and unreliable electricity grids, publicly run by the under ...

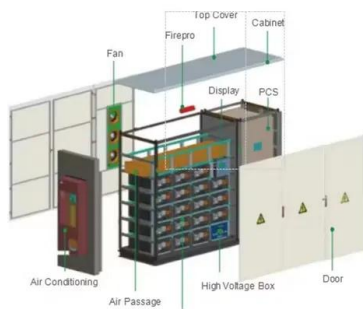

## Haiti

Haiti's relatively underdeveloped electricity grid means it can integrate renewable energy into its energy supply. According to the World Watch Institute study in 2014, Lake Azuéli in the country has potential that makes it the most attractive wind site in Haiti.

## ENERGY PROFILE Haiti
