UM study proposes technical pathways for achieving

A research team led by Yonghua Song, rector of the University of Macau (UM) and director of the university's State Key Laboratory of Internet of Things for Smart City (SKL-IOTSC), recently proposed technical pathways for accelerating the progress towards carbon neutrality in Macao's energy system. The study of the research team, titled 'Typical Pathways ...

SCIENCE CHINA Technological Sciences

Earth space. Macao Science Satellite-1, medium-energy electron spectrometer, inner radiation electrons, Southern Atlantic Anomaly, electrons in near-Earth space with high energy and pitch angle resolution. It can effectively distinguish between pre-cipitating, quasi-trapped, and trapped electrons, providing

High-energy electron spectrometer on Macao Science Satellite-1

Macao Science Satellite-1 (MSS-1) is a two-star constellation mission sponsored jointly by the China National Space Administration (CNSA) and the Macau University of Science and Technology (MUST).

China's space exploration satellites 'Macao Science 1' ...

Satellite B is equipped with high-energy particle detectors and solar X-ray instruments to obtain space environment data. The "Macao Science 1" project has the highest accuracy of geomagnetic field detection in China.

Macau Institute of Space Technology and Application

After more than four years of joint efforts by the government of the Macao Special Administrative Region and the National Space Administration, the "Macao Science 1" satellite was successfully launched on May 21. Currently, all ...

CGTN: New highland: Macao boosts tech innovation, talent ...

1 ??· In 2014, Lei Zhen, a graduate from Tsinghua University in Beijing, chose to settle in the Macao Special Administrative Region (SAR). He decided to start his business in Zhuhai, south China's

Hong Kong-Zhuhai-Macao bridge, China

The ultra-large sea crossing Hong Kong - Zhuhai - Macao bridge, passing through Lingding bay, is the longest bridge-tunnel complex in the world. This bridge connects Hong Kong, Macao with Zhuhai in Guangdong province. It is divided in 3 parts - offshore bridge, undersea tunnel and artificial islands.

High-energy electron spectrometer on Macao Science Satellite-1

DOI: 10.1007/s11431-023-2647-2 Corpus ID: 274199411; High-energy electron spectrometer on Macao Science Satellite-1
@article{Ye2024HighenergyES, title={High-energy electron spectrometer on Macao Science Satellite-1}, author={Yu Guang Ye and Ying Liu and Hong Zou and Qiugang Zong and JiaLi Chen and Xiangqian Yu and WeiHong Shi and ...

HK, Macao add thrust to China's space exploration

Many people in Hong Kong and Macao, such as Qian, are actively contributing to the nation's

space exploration efforts. For example, Macau University of Science and Technology, or MUST, has been involved in data analysis and scientific research for the Chang'e project since 2005 is the first university in the Guangdong-Hong Kong-Macao Greater

Hengqin, Macao honing model of collaborative development

5 ????· Over the past three years, Hengqin has endeavored to aid in Macao's moderately diversified industrial development while constructing a livable and workable space for its residents. To this end

Medium-energy electron spectrometers on Macao Science

Combined with the geomagnetic index, solar wind parameters, interplanetary magnetic field conditions, etc., it can also help to build a dynamic evolution model of energetic electrons in the near-Earth space, to realize the early warning and prediction of space weather based on the observation data, which can provide safety for spacecraft and

Chakra Space: Finding Balance Through Wholesome ...

Chakra Space joined forces with two other Macau-born brands to present the community with wholesome food, artisan bread, and freshly brewed coffee. The interiors have been designed to feel in sync with the tranquil energy flowing at ...

Macao Science 1 successfully launched

As the first scientific exploration satellite to survey Earth's low latitude magnetic field and space environment changes and China's highest accuracy satellite of geomagnetic field detection, it will markedly boost China's space magnetic survey technology.

Macao Science-1 a successful example of 'one country, two ...

...

4 ????. The sun constantly emits high-energy particles that hurtle toward Earth at high speeds. According to the China National Space Administration (CNSA), Macao Science-1 project is the first

Medium-energy electron spectrometers on Macao Science

The Macao Science Satellite-1

is a two-satellite constellation specifically designed to study the geomagnetic field and particle radiation environment in low Earth orbit, particularly in the South Atlantic Anomaly region, with a low inclination orbit. Each of the two MSS-1 satellites carries a medium-energy electron spectrometer (MES). The MES sensor heads are based on pinhole ...

China's space exploration satellites 'Macao Science 1' put into use

Satellite B is equipped with high-energy particle detectors and solar X-ray instruments to obtain space environment data. The "Macao Science 1" project has the highest accuracy of geomagnetic field detection in China.

Global Times: Macao Science-1 a successful example of 'one ...

4 ???· According to the China National Space Administration (CNSA), Macao Science-1 project is the first jointly developed space science satellite program by the Chinese mainland and Macao. It is also

China launches "Macao Science 1" space exploration satellites

Satellite B is equipped with payloads like high-energy particle detectors and solar X-ray instruments to obtain space environment data. Macao Science 1 has the capability to complement the observations made by Europe's Swarm satellites and China's first seismo-electromagnetic satellite, Zhangheng 1.

Macao science satellites begin study of South Atlantic Anomaly

Zhang Keke, director of the Macao Institute of Space Technology and Application and chief scientist of the Macao Science Satellite 1 project, highlighted the network's world-class detection capability and accuracy in an exclusive interview. The research from these satellites will help mitigate the impact of high-energy particles from the

Medium-energy electron spectrometers on Macao Science ...

Combined with the geomagnetic index, solar wind parameters, interplanetary magnetic field conditions, etc., it can also help to build a dynamic evolution model of energetic electrons in the near-Earth space, to realize the early warning and prediction of space weather based on the observation data, which can provide safety for spacecraft and
