Overview

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

Who is PT Indo energy solutions?

PT Indo Energy Solutions is the Largest Supplier Of Sustainable Feed-Stock Made From Agricultural Waste - Palm Oil Mill Effluent (POME) in the production of low carbon fuel in Indonesia. Low carbon fuels are produced from agricultural waste that do not compete with food production.

Are solar panels a viable source of electricity in Eswatini?

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating.

Why is hydroelectric power important in Eswatini?

Projects such as these conserve millions of liters of fuel throughout their lifetime and ensure year-round reliable and sustainable electrification for public facilities. Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini.

Eswatini into energy solutions

Our Exports

At PT Indo Energy Solutions, we are proud to consistently export a significant volume of our sustainable feedstock made from agricultural waste, particularly Palm Oil Mill Effluent (POME), for the production of low carbon fuel. Our commitment to sustainability and environmental responsibility drives our efforts to contribute to the global

Millions of dollars earmarked for energy transition in Eswatini

Prince Lonkokhela, the minister of Natural Resources and Energy, announced at the event that Eswatini is set to increase its electricity generation capacity by 241 megawatts as of July 2026 in an ambitious goal for universal, affordable, reliable and modern energy by 2030. As highlighted during the forum, this presents excellent opportunities

Eswatini

Eswatini is building capacity for its energy transformation - both on the level of its energy sector staff and with a view to creating enabling conditions for increased clean energy investment. GET.transform is among the country's chosen partners in advancing this sector transformation.

Eswatini: Nuclear energy technology to aid development goals

The International Atomic Energy Agency (IAEA) is assisting the Kingdom of Eswatini in its sustainable development agenda in the healthcare, agriculture and nuclear energy sectors. IAEA experts are working with their counterparts in Eswatini to design a national programme for the 2025-2026 technical cooperation (TC) cycle.
