Solar PV products are a significant export for China. In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years.

Solar modules, which are fully assembled solar panels, accounted for 90% (\$23.8 bn) of China's total solar exports by value in the first half of 2023. Over the last 12 months, China exported 111 GW of solar modules to Europe, the same amount as the total installed PV capacity of the United States.

It cut the wholesale price of panels it sells by nearly half. And its exports of fully assembled solar panels climbed 38 percent while its exports of key components almost doubled.

Rapid solar capacity expansion overwhelms the grid, PV manufacturers compete for market shares, and then large target markets slap import tariffs on Chinese PV products, taking off their .

LITTLETON, Colorado, Feb 28 (Reuters) - China maintained its dominant grip on the export of solar panels and modules in 2023, boosting global shipments by over a third from 2022's totals .
