Falklands on the way to reduce fossil fuel consumption

As well as a solar energy pilot scheme at Sand Bay, there are plans to retrofit existing housing stock with more energy efficient measures. The department is recording data from the new houses to see which energy systems will work best in older properties.

Power and Electrical Section

On average, just over 30% of Stanley's power requirement is met by the Sand Bay wind farm. Three Enercon E-33 turbines make up the Mare Harbour wind farm, which came online in December 2014 and which generates power for Mount Pleasant Complex.

Falkland Islands , Powertec Information Portal

Additionally, the country is exploring renewable energy options, including wind and solar power, to reduce dependence on fossil fuels and enhance energy security. The unique geographical and demographic characteristics of the Falkland Islands require tailored approaches to technology and telecommunications development in the region.
