

European Solar and Energy Storage Solutions

Faroe Islands best solar manufacturer

Overview

Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self-sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Are there renewables in the Faroe Islands?

“In the Faroe Islands, we are blessed with renewables: we have wind, hydro and some sun in the summer; we also have tidal and wave power where we can see great potential,” says Nielsen. Since announcing its green vision in 2014, SEV has already done a lot to increase the share of renewables in its energy mix.

Who are the biggest private companies in the Faroe Islands?

One of the biggest private companies of the Faroe Islands is the salmon-farming company Bakkafrøst, which is the largest of the four salmon-farming companies in the Faroe Islands and the eighth-biggest in the world. This list includes notable companies with primary headquarters located in the country.

Are the Faroe Islands a sustainable country?

Did you know that the Faroe Islands is one of the world’s leading nations in producing sustainable electricity with over 50% of the nation’s electricity deriving from renewable energy sources?

There is no shortage of renewable power in the Faroe Islands, due to the ocean currents and tides of the Northeast Atlantic and an abundance of strong wind.

Should the Faroe Islands be self-sufficient?

Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries. SEV operates six hydro power plants, three thermal power plants, three wind farms and one solar power plant.

Will the Faroe Islands use more green energy in 2025?

Even more conservative scenarios predict that the Faroe Islands' current electricity consumption of approximately 350,000 MWh per year will increase to approximately 450,000 MWh in 2025. "The current discussion recommends using more green energy and especially the potential for wind energy is quite high," says one of the islanders.

Faroe Islands best solar manufacturer

SEV and Faroe Islands see impressive sustainable energy gains ...

No doubt the world will continue to take note of SEV and the Faroe Islands as they achieve energy autonomy through global collaboration and lead the world in adopting fully sustainable energy. Hitachi Energy is proud to work with customers like SEV in driving the evolution of the grid itself.
