Ferro energy Japan

Overview

Is there a ferro coke production facility in Japan?

In Japan, the New Energy and Industrial Technology Development Organization (NEDO) and JFE Steel Corporation have built a medium-scale ferro coke production facility with a daily production capacity of 300 tons and begun demonstration testing.

What services does Ferro Japan KK offer?

Ferro Japan KK offers recycling services. The Company recovers nonferrous metals and alloys from new and used scraps. [How Worried Should You Be About Commercial Real Estate?](#)

What is Ferro Coke?

Completed ferro coke contains 70% coke and 30% iron. The output capacity is 40 tonnes per day for molded material and 30 tonnes per day for ferro coke. JFE Steel plans to alternate 30% of ordinary coke with ferro coke put in a blast furnace. Ferro coke can lower temperature of sinter reducing reaction and reduce total coke usage and CO2 emission.

What is Ferro-Coke technology?

Ferro-coke is a technology for significantly reducing CO 2 emissions by improving the reduction rate of iron ore put into blast furnaces. We consider implementing innovative technologies as critical and will advance with this strategy together with the government.

What is Ferro-Coke made of?

Ferro-coke is a hybrid agglomeration of coke and metallic iron which are produced from coal and iron ore by crushing, mixing, formed and heated in a continuous carbonizing furnace. Low grade coal or iron ore can be used as

materials of ferro-coke. Ferro-coke converts regularly used coke as a blast furnace material.
