About solar power in Finland

In Finland, a number of hybrid projects are in the pipeline, combining wind, solar and also energy storage. These solutions will balance our energy system. On a global scale, solar power is one of the fastest growing forms of energy generation - its size and importance in the world's energy mix is huge, larger than wind power.

About Us

For more than four decades we have been creating solutions that have helped in decreasing the use of conventional energy sources. With years of research and development we have created numerous sophisticated technologies that have made it possible for us to open the world's first fully automated solar panel factory in Salo Finland.
