48.0V or 51.2V

Overview

The My Energi Eddi is a remarkable and effective energy saving device. Eddi Diverts surpluses power from your solar energy system and uses it to heat your water or rooms.

The My Energi Eddi is a remarkable and effective energy saving device. Eddi Diverts surpluses power from your solar energy system and uses it to heat your water or rooms.

The MyEnergi eddi+ is an advanced 3-phase energy diverter, designed to maximise the use of your self-generated solar or wind power. What is Eddi by myenergi?

Maximise your self-generated solar or wind power with eddi by myenergi. Divert excess energy to your heating systems for efficient, green energy use at home.

How much does a myenergi Eddi cost?

The myenergi Eddi is the UK's leading solar diverter, with prices starting from £600+VAT. It diverts surplus solar energy from your solar PV array to power your immersion heater, allowing a home's hot water demand to be supplied by solar energy - for free! The myenergi eddi and harvi can be installed with GreenGen.

What is Eddi & how does it work?

Use your power. Your way. eddi is designed to help you maximise the consumption of your self-generated solar / wind power. A solar photovoltaic (PV) system without an eddi is a like a car without a steering wheel or driver. Without an eddi, you have no control over where you want your self-generated energy to go, or how you want to use it.

How do I buy Eddi & installation?

For eddi with full installation, click 'Buy eddi & installation' below to tell us

your installation requirements and receive your quote. To simply buy eddi on its own, add it to your basket. Plus, if you're looking for a way to monitor your energy consumption, check out the harvi wireless energy monitor.

Mit eddi® nutzt du überschüssigen Solarstrom zu Hause, statt ihn ins Netz zu speisen. Unser cleveres Energiemanagement-System verteilt die Überschussenergie deiner Photovoltaik-Anlage (PV-Anlage) automatisch an die elektrischen Großverbraucher in ...

eddi

Bring an eddi into your home and you can take full advantage of the 100% green energy generated by your solar PV or wind generation system. Instead of feeding it back to the grid, your energy generation investment becomes more efficient because our intelligent eddi product feeds energy back into your heating systems.

eddi

Introduisez un eddi dans votre maison et vous pourrez profiter pleinement de l'énergie 100% verte générée par votre système de production solaire PV ou éolien. Au lieu de la renvoyer au réseau, votre investissement dans la production d'énergie devient plus efficace car notre produit intelligent eddi renvoie l'énergie à vos systèmes de chauffage.

Wozu wird der myenergi eddi benötigt?

Was der myenergi eddi kann und wofür man ihn benötigt. Der eddi von myenergi ist ein sogenannter Leistungsverteiler, der den selbst erzeugten Strom (z. B. durch PV/Solar) bestmöglich im Gebäude verteilt. Der eddi hilft dabei, den Eigenverbrauch zu steigern. Einfach gesprochen: der eddi kümmert sich im Haus um das Energiemanagement.

Product Overview

The eddi+ device is now optimized for international markets, specifically targeting the DACH region (Germany, Austria, and Switzerland), where three-phase power supplies are common. Here's how eddi+ is designed to meet the needs of customers in these areas and beyond:

The UK's 1# Solar Power Diverter: eddi , myenergi UK

With a PV system or wind turbine, you often generate more electricity than you currently consume. Our intelligent eddi diverter uses this surplus to supply your home with hot water. By bringing eddi into your home, you can take full advantage of the 100% green energy from your PV system or wind turbine. Order eddi

eddi support

The eddi allows you to store energy as hot water or heat even when you are out. Later on in the day you are able to use this free hot water in the home. Without the eddi you will be paying up to 15.0p per unit to heat your water. You may as well make the most of your own generated energy whilst it's available.

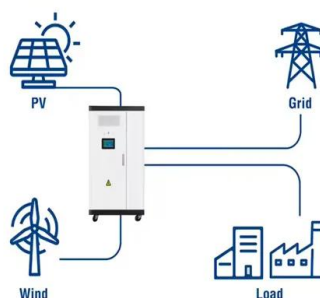

Eddi - Reducing Emissions and Bills One Household At A Time
