Gkinetic energy ltd China

Overview

Who are gkinetic energy?

GKinetic Energy Ltd are now progressing projects with a number of farms and landowners as our unique range of simple, small and safe Water turbines provide reliable, clean energy when it's needed most; through the night & through the winter. Our CTO Gary Brennan. What's in the water in Milwaukee?

!.

How does gkinetic work?

GKinetic are leading developers of innovative, patented turbines that work with nature to generate 100% clean, predictable energy from free-flowing water. We offer a clean, sustainable alternative to diesel generators and unlike competing hydrokinetic devices, our turbine works at average, lower flow speeds.

What is gkinetic technology?

GKinetic's technology is ideally suited to island applications. The device is floating and can be moored like a boat. Due to its innovative design, it does not require blocking flows or major civil works. It can be deployed in sites as shallow as 1.8m.

GKinetic energy ltd China

GKinetic Energy , Tethys Engineering

GKinetic Energy Ltd. was founded in 2014 and is based in Newcastle West, County Limerick in Ireland. GKinetic is developing a range of innovative hydrokinetic turbines for both river and tidal flows. From the start, one of the main drivers has been the huge market opportunity to harness this reliable and predictable renewable energy resource.

GKinetic Energy Ltd is pleased to announce the promotion of Gary Brennan from Lead Engineer to the position of Chief Technology Officer (CTO). With this strategic appointment, GKinetic aims to further strengthen its ...

GKinetic receives US Patent approval

GKinetic Energy are now patent protected in the United States of America for the "Water Turbine Assembly" aspect of our tidal energy technology. The news of our first North American patent came last week following our Chinese patent ...

GKinetic Energy

GKinetic Energy develops and operates hydrokinetic turbines. The company generates renewable energy from free-flowing water sources, such as oceans, rivers, and canals. GKinetic Energy uses sound engineering principles to create kinetic turbine devices.

GKinetic Energy Limited

GKinetic offer a range of hydrokinetic turbines that instantly generate clean energy from free-flowing water. Thanks to its patented 'bluff body' concept more power can be generated from slow-flowing water which is found in most deployment sites, thus opening up the mass market via a distinct competitive advantage with 10 patents granted
