Dyness Knowledge , Lithium battery SOC concept analysis

Abstract: Lithium-ion batteries are more and more widely promoted and used in modern life. The State of Charge (SOC) of a lithium battery is equivalent to a car's fuel tank. Always remind the user how much power is currently

available, for example, 100% power is equal to a full gas tank. 0% means that the battery is exhausted, that is, no gasoline is in the fuel tank.
