Gundam Solar Power Generation Theory

Overview

A Gundam Nucleus (GN) Drive (aka solar reactor, solar furnace) is a powerful energy system within Mobile Suit Gundam 00 designed to give a mobile suit a significant advantage in combat. Invented by Celestial Being, the technology was later reverse-engineered by the Corner Family to create the GN Drive Tau.

- The number of surviving GN Drive was one of continuous retcon after the end of Season 2 and before the release of the movie. Initially, Mizushima.

How many GN drives did celestial being have in Gundam 00?

In the First Season of anime, Gundam 00, and its side-stories, Celestial Being possessed 5 GN Drives; 4 with the Ptolemaios and 1 in the Fereshte. The UN Forces later managed to get their hands on the GN Technology in the second half of the First Season, thanks to Laguna Harvey, and were able to obtain psuedo-solar reactors (GN Drive [T]).

What is the main power source for the Gundams?

GN Drive - The main power source for the Gundams. This semi-perpetual device is also commonly referred to as the Solar Furnace. When protons are forced to decay, a great amount energy is released with GN Particles as a

byproduct of the process. Due to its special core, it can only be made at Jupiter with a long production period.

What technology was used in Gundam 00?

This is a list of technology from the Anno Domini timeline of the Gundam series Gundam 00 . In a future where fossil fuels have run low, solar energy is the vital alternative to fighting over resource deposits.

What technology does the Gundams use?

Individual Information Attestation System - A unique pilot identification authorization and registration system installed onto the Gundams. Quantum Communications - Quantum Communication is a technology exclusive to Celestial Being that allows communications regardless of physical distance.
