What is the power sector policy in Guinea Bissau?

Guinea Bissau: Power Sector Policy Note EXECUTIVE SUMMARY The electricity sector in Guinea Bissau is in the midst of a transformational reform towards a sustainable development characterized by reliable, greener and affordable service delivery.

How much power does Guinea Bissau receive?

Guinea Bissau receives a capacity of 27.5 MW and an energy share of 167 GWh per year from the Kaléta (240MW) and Soaupiti (480MW) hydropower plants. The Power Purchase Agreement was signed in December 2019.

Will the power sector change in Guinea Bissau in 2022?

The power sector in Guinea Bissau is expected to undergo significant changes during the second half of 2022.

How will solar power work in Bissau and Gabu?

In Bissau and Gabu, solar photovoltaic (PV) plants will help reduce the average cost of electricity and diversify the energy mix. Battery storage will help integrate this variable energy source into the grid. In Bafata, Gabu, and Cacheu, the PV plants will provide cheaper and cleaner local power generation than current diesel production.

How many PPAs has EAGB signed with IPPs in Guinea Bissau?

In Guinea Bissau, the power purchaser EAGB has signed two PPAs so far: the first with the Karpowership company for a 30 MW HFO power barge, and the second with Electricité de Guinée (EDG), the national public electric utility of Guinea, for importing power through the OMVG transmission line by 2022.

Can solar power be developed in Bissau & Bijagos?

According to a feasibility study completed in April 2020 with the support of the World Bank and ESMAP, 30 MW of solar PV in Bissau and 36 MW in countryside cities, as well as two solar PV mini-grids in the Bijagos islands, could be developed.

## Guinea-Bissau , Powertec Information Portal

Guinea-Bissau, situated on the west coast of Africa, is a small, tropical country characterised by a fragmented geography of islands and estuaries. This remote landscape poses a challenge for the implementation of standardised telecommunications and technology infrastructure. With a population of approximately 2 million people, the majority live in rural areas, further ...

## ENERGY PROFILE Guinea-Bissau

Onshore wind: Potential wind power density (W/m<sup>2</sup>) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global distribution of wind resources. Areas in the third class or above are considered to be a good wind resource.
