# Household solar power generation scheme

## Overview

---

What is solar subsidy scheme in India?

Under the scheme, households will be provided with a subsidy to install solar panels on their roofs. The subsidy will cover up to 40% of the cost of the solar panels. The scheme is expected to benefit 1 crore households across India. It is estimated that the scheme will save the government Rs. 75,000 crore per year in electricity costs.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

What is Modi's solar subsidy scheme?

The scheme was launched by Prime Minister Narendra Modi on February 15, 2024. Under the scheme, households will be provided with a subsidy to install solar panels on their roofs. The subsidy will cover up to 40% of the cost of the solar panels. The scheme is expected to benefit 1 crore households across India.

How will EPA's 60 solar for all program help low-income households?

EPA estimates that the 60 Solar for All recipients will enable over 900,000 households in low-income and disadvantaged communities to deploy and benefit from distributed solar energy. This \$7 billion investment will generate over \$350 million in annual savings on electric bills for overburdened households.

How does solar for all help low-income and disadvantaged communities?

Residential solar cuts home energy bills and provides families with resilient

and secure power, and Solar for All will help low-income and disadvantaged communities experience these meaningful benefits, such as guaranteeing a minimum 20% total electricity bill savings for households benefiting from the program.

Will solar power save the government Rs 75,000 crore per year?

It is estimated that the scheme will save the government Rs. 75,000 crore per year in electricity costs. Suitable Rooftop Solar Plant Capacity for households
