This 120 half cell HJT bifacial double glass solar panel provides a powerful combination of increased PV module efficiency, energy savings and durable long-term performance. Featuring a 22.4% module efficiency and 615-635 watts per panel, it delivers an advanced renewable energy source with zero emissions.

Length: ±2mm. Width: ±2mm. Height: ±1mm. Row Pitch: ±2mm. Distances measured from corner to corner. For detailed sizes and tolerance specification, please consult detailed module drawing.

Please be kindly advised that PV modules should be handled and installed by qualified people who have professional skills and please carefully read the safety and installation instructions before using our PV modules. What is a bifacial photovoltaic panel?

Bifacial photovoltaic panels 625W - Jinko Solar Tiger Neo 78HC-BDV 605-625W double glass Bifacial photovoltaic panels are becoming increasingly popular in the solar industry due to their ability to capture sunlight from both sides of the panel, which results in a higher energy output compared to traditional photovoltaic panels.

What are Jinko Solar bifacial photovoltaic panels?

Jinko Solar's bifacial photovoltaic panels are renowned for their high efficiency and advanced technologies. Among the many technologies utilized in their panels is the Multi Busbar (MBB) technology, which is designed to reduce the resistance losses and improve the overall performance of the panels.

What is a comet 2n+ commercial solar panel?

Our lightweight Comet 2N+ Dual-Glass Commercial solar PV panels are ideal for business owners, featuring a grid-free front design and reduced connection points, delivering high efficiency.
