How to clean photovoltaic panels installed on the roof

Overview

The best way to clean solar panels is to use a soft-bristled brush or squeegee specifically designed for solar panels, along with a mild soap or specialized cleaning solution.

The best way to clean solar panels is to use a soft-bristled brush or squeegee specifically designed for solar panels, along with a mild soap or specialized cleaning solution.

Step-by-step guide: Turn off the solar panel system for safety. Fill a bucket with water and mild detergent. Gently scrub the panel surface using a long-handle soft-bristle brush while standing on the ground. Rinse using a hose, opting for a gentle flow via the spray nozzle.

Find a safe place to stand, spray soapy water on the panels and then thoroughly rinse them off. It's really that simple.

Steps to DIY Clean Solar Panels on Roof: Put the cleaning solution into a bucket. Soak a mop or sponge in the solar panel cleaning solution. Wash your solar panels with the mop or sponge. Use a hose to spray off any excess cleaning solution. Repeat every 3 - 6 Months.

The most effective way to clean your solar panels is with a hose and a bucket of soapy water. Essentially, in the same manner you would wash your car at home.
