How to fix the photovoltaic panels after unpacking

Overview

Here are some steps to help you do that: First, assess the damage. If the panel is cracked or shattered, it will need to be replaced. Next, clean the damaged area. Remove any dirt, dust, or debris that may be preventing the panel from functioning properly. Then, apply a sealant to the damage. Finally, test the panel to make sure it is working properly. .

Here are some steps to help you do that: First, assess the damage. If the panel is cracked or shattered, it will need to be replaced. Next, clean the damaged area. Remove any dirt, dust, or debris that may be preventing the panel from functioning properly. Then, apply a sealant to the damage. Finally, test the panel to make sure it is working properly. .

Step-by-step process: Spread the laminating film over the cracked solar panel. Use the squeegee to uniformly spread the film, removing any bubbles or folds between the panel surface and the film. Use the heat gun to fuse the laminate film to the panel surface.
