How to install photovoltaic panels at high speed

Overview

Most rooftops in the United States are built up from plywood and finished with asphalt shingles. However, depending on your region and neighborhood aesthetic, the top layer of the roofing type can vary greatly. We often find Spanish tiles in the south, metal seam roofs in the far north, and clay, slate, and concrete.

In South Florida, the local building code requires some rooftop solar systems within a mile of the ocean to be able to withstand uplift generated by winds greater than 180 miles per.

Now that we've covered the basics of connecting solar panels to a roof, it's time to find a place for the panels. The most obvious feature we're looking for is large, uninterrupted roof space.
