How to install the bracket of solar floodlight

Overview

How do you install a flood light on a solar panel?

Plug the light sensor in the flood light, imitating daylight. Plug the flood light into the solar panel and secure in place by screwing on and fully tightening the cap. Experiment with desired position of both the flood light and solar panel, ensuring there is enough slack in the cable to safely.

How do I connect a floodlight bracket to a solar panel?

Connect the floodlight and solar panel cables (see below). Check the waterproof cable connector(s) are secure. Follow steps 4 and 5 above. Attach the relevant 76mm or 60mm brackets to both the floodlight bracket and solar panel bracket as per the instructions. Mount the bracket securely onto the column with the solar panel as high as possible.

How do you install a floodlight fixture?

It is recommended to use as much material as possible to secure any electrical wire connection. Now that the wires are connected, the rest of the installation process is quite easy; screw in the floodlight fixture to its mounting strap and then screw the light bulbs into their reserved locations.

How do I attach a black floodlight bracket?

Attach the black floodlight bracket to the floodlight using the 2x M8 hexagonal bolts, flat washers and lock washers (see diagram). Do not overtighten to allow adjustment after installation. 14mm spanner required.

How to install a solar panel bracket?

To install a solar panel bracket, apply adhesive to the upper side of the bracket (this is where the solar panel will be positioned). Position and press firmly the side bracket along the side of the solar panel and repeat this process with the other side bracket. Allow the adhesive to dry as per the product specifications.

How do I turn off a flood light?

Remote control can command more than one fitting in range. Infra-red sensor is located in the flood light lens. For first time use, select the AUTO function. To turn off permanently / enter sleep mode, hold down the off button for 5 seconds (the light will turn off, flash on twice and then turn off permanently).
