IBM Works with Ireland to Push Ocean Energy

IBM Research announced a project today to investigate the effects of wave energy devices on marine life in Ireland, host to one of the largest concentrations of wave energy in the world. With the demand for renewable energy resources particularly high in Ireland, the research is critical in determining the scope of wave energy potential.

IBM and SEAI Launch Wave Energy Project Offshore Ireland

IBM and The Sustainable Energy Authority Ireland (SEAI) are working together to understand and minimize the environmental impact of converting wave energy into electricity. This project, the first to use real-time streaming analytics for monitoring underwater noise generated by wave energy conversion devices, represents a significant step toward the ability ...

What are renewable energy certificates (RECs)?

Organizations use RECs--along with other types of energy attribute certificates such as zero-emissions credits (ZECs)--to support clean energy goals associated with the fight against climate change and comply with carbon emissions regulations.. RECs represent electricity that could have otherwise been generated by fossil fuels such as oil, coal and natural gas.

IBM, Sustainable Energy Authority Ireland Focus on Renewable Energy

Collaboration to Drive Progress Toward Ocean As Energy Source. DUBLIN, IBM (NYSE: IBM) and The Sustainable Energy Authority Ireland (SEAI) are working together to understand and minimize the environmental impact of converting wave energy into electricity.

IBM teams with ESB to develop an Electric Vehicle Smart Charging IT

IBM announced that it has teamed with ESB to implement a fully integrated smarter charging IT system that will help manage electric vehicle public charge-points, which are being rolled out across Ireland by ESB Networks. Together the companies will add a layer of intelligence and

convenience to the recharging process, allowing EV drivers to access, charge ...

IBM teams with ESB to develop an Electric Vehicle Smart Charging ...

This innovative partnership between an Irish energy company and a global IT leader puts Ireland at the forefront of global developments in the electric vehicle sector by using cutting edge

Energy Archives

Energy ecosystems and new business models may feel quite theoretical and distant alongside the pressures for today's energy businesses. However, we all intuitively know we have to go there and there has to be a whole system collaboration to enable the energy transition and go some way to mitigating the impacts of climate change. The [...]

What is Energy Management?

In contrast, intelligent energy systems alert you to equipment breakdown and energy wastage immediately. They provide real-time information on energy consumption, and you can set energy KPIs for consistent results. Having a proactive maintenance strategy, with routine and preventive maintenance schedules, means that equipment is serviced

Ireland , IBM

HSE chose to build a platform on Salesforce cloud technology with IBM Consulting using the

IBM Garage(TM)--a framework for transformation that combines people, processes and technology. The all-remote team was able to bring in top talent from around the world--from Ireland, the UK, Israel, Egypt and Australia to the US and India.

IBM, ESB Launch 'Smarter' EV Charging System in Ireland

IBM today announced it has partnered with ESB Networks to deploy a "smarter" electric vehicle charging system to manage about 1,000 public charging points across Ireland, allowing EV drivers to access, charge and pay using an identification card.

IBM, ESB Launch 'Smarter' EV Charging System in Ireland

Informational Sustainability and Energy Management News Content. IBM today announced it has partnered with ESB Networks to deploy a "smarter" electric vehicle charging system to manage about 1,000 public charging points across Ireland, allowing EV drivers to access, charge and pay using an identification card.

Frontier Fusion: Accelerating the Path to Net Zero with Next

IBM's expertise in complex systems engineering and supercomputing and the Hartree Centre's expertise in democratising HPC and AI into the engineering sector, combined with UKAEA's

leading R& D in fusion energy will be a powerful force for progress in this hugely important field."

IBM works with Irish to assess environmental impact of wave power

IBM and The Sustainable Energy Authority Ireland are working together to understand and minimise the environmental impact of converting wave energy into electricity. This project, the first to utilise real-time streaming analytics for monitoring underwater noise generated by wave energy conversion devices, represents a significant step toward

Capacity for today, and tomorrow.

Evolution is a natural state for technology and for business, both must constantly evolve and move forward to keep up with demand in one way or another. Vivo Energy, the distributor of Shell and Engen branded fuels to retail and commercial customers across Africa, is no different. Over the last few years Vivo Energy has seen substantial and continuous growth ...

System calculators

Use system calculators to determine the system power load or the distributed floor load for your system. Power calculators. The IBM® Systems

energy estimator is a web-based tool for estimating power requirements for IBM systems. This tool estimates typical power requirements (watts) for a specific system configuration under normal operating conditions.
