Illustration of the transportation plan for photovoltaic panels on the mountain

Overview

Are roads and industrial roof tops misclassified into PV power stations?

Other land cover types especially the roads and industrial roof tops may be misclassified into PV power stations. The drawback of this study is that roads and other facilities have not been classified, leading to a risk of underestimating the areas of PV power stations.

Is photovoltaic pavement a viable energy harvesting technology?

Recommendations for its future development are proposed in six aspects. As an emerging energy harvesting pavement technology, the photovoltaic (PV) pavement, which combines mature photovoltaic power generation technology with traditional pavement facilities, can make full use of the vast spatial resource of roadways.

What land is used for PV power stations?

The land used for PV power stations includes gobi (left), grassland (top), water bodies (right), mountain land (bottom), etc. As for PV power station mapping, previous methods mainly focused on field survey and visual inspection, where manual annotation was performed to delineate the locations or boundaries based on the remote sensing imagery.

Which data format is used in a PV power station map?

The data format is GeoTIFF while the spatial reference is WGS-84. Meanwhile, only two kinds of values are in the PV power station map, where 0 stands for the non-PV regions while 1 represents the PV power stations.

What is the difference between 0 & 1 in a PV power station map?

Meanwhile, only two kinds of values are in the PV power station map, where 0 stands for the non-PV regions while 1 represents the PV power stations. In addition, the provided PV dataset could be loaded into GIS software such as ArcGIS and QIS for data visualization and spatial analysis.

Which Technology cooperates with PV pavements?

Piezoelectricity is another general technology that cooperated with the PV pavement. In 2012, Selvaraju et al. introduced an auxiliary energy system employing piezoelectric transducers for solar roadways . The optimal location of piezoelectric elements was determined based both on COMSOL analysis and vibration experiment.
