# Iraq greencore power solutions

## Overview

---

Does Iraq have a green energy policy?

The establishment of Iraq Renewable Energy and Energy Efficiency Agency in 2010 and the formation of the Iraq Renewable Energy Agency (IREA) in 2016 further solidified the country commitment to green energy. In 2018, the country electric power consumption had risen to 0.75 MWh per capita, and wind energy capacity reached 100 MW.

Can a green hydrogen-based energy system help Iraq achieve sustainable economic resilience?

The study investigates the potential of transitioning Iraq, a nation significantly dependent on fossil fuels, toward a green hydrogen-based energy system as a pathway to achieving sustainable economic resilience. As of 2022, Iraqi energy supply is over 90% reliant on hydrocarbons, which also account for 95% of the country foreign exchange earnings.

Does Iraq need a green hydrogen economy?

Iraq faces a unique set of obstacles that must be addressed to ensure a successful and sustainable shift towards a green hydrogen economy. One of the challenges for sustainable country transition to a green hydrogen economy lies in its energy infrastructure, which relies heavily on fossil fuels.

What is the future of electricity supply in Iraq?

There are a number of pathways available for the future of electricity supply in Iraq but the most affordable, reliable and sustainable path requires cutting network losses by half at least, strengthening regional interconnections, putting captured gas to use in efficient power plants, and increasing the share of renewables in the mix.

Can Iraq become a green hydrogen leader?

If Iraq can position itself as a player in the green hydrogen market, it could

open up new opportunities for exports and international partnerships. This would not only boost Iraq economy but also enhance its geopolitical influence by positioning it as a leader in the global transition to clean energy.

What is Iraq's energy supply like in 2022?

As of 2022, Iraqi energy supply is over 90% reliant on hydrocarbons, which also account for 95% of the country foreign exchange earnings. The global energy landscape is rapidly shifting towards cleaner alternatives, and the volatility of oil prices has made it imperative for the country to diversify its energy sources.
