Is solar panel photovoltaic power generation a scam

Overview

The Energy Department and the Solar Energy Technologies Office have warned consumers about this type of online scam involving solar panels. We rate this claim False. Support independent fact-checking.

The Energy Department and the Solar Energy Technologies Office have warned consumers about this type of online scam involving solar panels. We rate this claim False. Support independent fact-checking.

Remind prospective customers that while tax credits, rebates, and incentives might be available for solar purchasers who qualify, offers for “free” or “no cost” solar panels are scams.

Solar panel scams are fraudulent or deceptive practices that unethical companies or individuals employ to take advantage of homeowners.

According to Merriam-Webster, a scam is “a fraudulent or deceptive act or operation.” So, by definition, solar panel scams are operations that use deceptive acts to try to sell solar systems. Are free solar panels a scam?

Know that “free” or “no cost” solar panel offers are scams. The federal government does not install solar systems in homes for free. If you’re considering whether solar energy is right for you, check out the Department of Energy’s guide for homeowners and learn more. Or check out the Department of Treasury’s guidance on clean energy.

What is a solar energy scam?

The scams vary, but here’s the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency. If you agree to the scammer’s offer, it could cost you tens of thousands of dollars.

Is residential solar a scam?

When done right, going solar can substantially reduce your carbon footprint and your energy costs. However, this rare double-whammy of benefits also makes the residential solar industry ripe for scams.

How do you know if a solar system is a scam?

Ask for a list of satisfied customers and look at customer reviews online. Know that the government won't offer you free solar. The federal government does not install residential solar panels for free; if someone is claiming otherwise, it's probably a scam. If it seems too good to be true, it probably is.

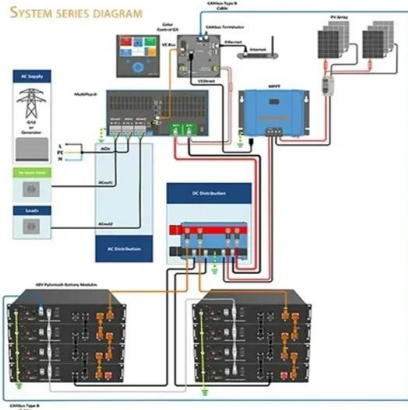

What are the most common solar panel scams?

Here are some common solar panel scams to look out for. Fake solar companies: Perhaps one of the most common solar scams involves creating a fake company and "selling" solar panel systems without any intention of ever installing them. These fake companies may request a large upfront deposit and then disappear before ever completing any work.

Is a solar lease a scam?

Solar lease or power purchase agreement (PPA) scams: Although leasing solar panels or financing using a PPA are not necessarily scams, these contracts are extremely difficult to break and can leave you saddled with an unwanted monthly payment for a solar array you don't even own.
