Yes, you can install solar panels flat, but they will experience a degree of energy loss without the slightest inclination toward the sunlight.

Your investment is unsafe if your solar panels are poorly installed on your roof. And typically, flat roofs lack the structure required for attaching the panels to the roof, so you will need to consider an alternative. If nothing secures your solar panels to the roof, they will come off at the slightest inconvenience.

There are advantages and disadvantages to installing solar panels completely parallel to a flat roof vs tilting them up. But the cons outweigh the pros, therefore our best advice for most circumstances is to install solar panels with a tilt of at least 10 degrees from horizontal.

What are the advantages and drawbacks of installing flat solar photovoltaic (PV) panels without a fixed or tracker mounting structure?

Flat roofs have a minimal slope allowance that will accommodate solar PV panel systems. A roof having a rise of 0.25 inches over a 12-inch run — known as a 0.25:12 pitch roof — is considered a flat roof. Should solar panels be installed parallel to a flat roof?

There are advantages and disadvantages to installing solar panels completely parallel to a flat roof vs tilting them up. But the cons outweigh the pros, therefore our best advice for most circumstances is to install solar panels with a tilt of at least 10 degrees from horizontal. Let's find out why.

Does a flat roof affect solar panels?

Dirt build-up. When solar panels are at an angle, dirt can slide off them, or at least wash off when it rains. With a flat roof, dirt will build up much more easily. The dirt blocks the sun, lowering your solar panel system's production. No warranty coverage.

Are flat solar panels better than tilted solar panels?

On the other hand, flat solar panels can be an advantage to those who need more solar power during the summer months, December through to February. However, they will produce less power in winter months. More commonly, people want a more consistent flow of generation all year round which is what you'll get from tilted solar panels.

Can a flat roof solar system be installed on a sloped roof?

Yes, you'll still be eligible for the same solar incentives and rebates whether you install your system on a flat or a sloped roof. Can I combine battery storage with my flat-roof solar system?
