Overview

Will a lithium-ion battery energy storage system be installed in Côte d'Ivoire?

A lithium-ion battery energy storage system (BESS) made by Saft will be installed at a 37.5MWp solar PV power plant in Côte d'Ivoire (Ivory Coast). It is the African country's first-ever large-scale solar project and the batteries will be used to smooth and integrate the variable output of the PV modules for export to the local electricity grid.

Will Ivory Coast start a solar power plant?

"After having experimented with fossil fuels and hydroelectricity, [Ivory Coast], which is rich in renewable energy potential, is about to commission its first solar power plant, marking its intention to vary its energy mix as much as possible," said Noumory Sidibé, the director general of CIE.

Is Cie launching a solar farm in the Ivory Coast?

CIE, the Ivory Coast's state-owned utility and subsidiary of French group Eranove, has recently completed the development of this solar farm in the Boundiali Department, Bangoué Region. The solar power plant is now set to supply clean electricity to 30,000 households in the region. But, its launch date is yet to be known.

Will Côte d'Ivoire launch its first solar plant?

But, its launch date is yet to be known. Noumory Sidibé, the Director General of CIE said that Côte d'Ivoire is rich in renewable energy potential, and after having experimented with fossil fuels and hydroelectricity, the country is about to commission its first solar plant.

How is the Ivorian solar project financed?

The solar project is financed by a concessional loan of €27 million from the German development bank KfW and a grant of €9.7 million from the European Union (EU). The Ivorian state contributed the remaining sum to reach the

necessary financing.

How much money did Germany spend on the Ivory Coast project?

Germany's Development Bank KfW financed the €40 million project with €27 million through the German Federal Ministry for Economic Cooperation and Development. The European Union added €9.7 million, and the government of Ivory Coast contributed the remaining sum.

Solar Off-Grid Lithium Battery Banks , BigBattery

Our solar batteries are the lowest-priced energy source in the long run and are cheaper than lead-acid batteries. Lithium-ion batteries can also store almost 50 percent more energy than lead-acid batteries! Additionally, they work between 5,000 and 8,000 cycles vs. the old 500 cycles that a lead-acid battery would provide you.

Ivory Coast set to commission first solar plant in Boundiali

It will install six of its Intensium Max High Energy containers with lithium-ion batteries. Furthermore, according to Saft, the energy storage system will offer capacity firming and PV smoothing services to the solar plant.
