Japan funds for solar energy projects

Overview

Among the renewables covered by the transition bonds are cutting-edge solar cells and floating offshore wind, and there are also projects that will help slash emissions, such as encouraging the.

Among the renewables covered by the transition bonds are cutting-edge solar cells and floating offshore wind, and there are also projects that will help slash emissions, such as encouraging the.

Solar PV – solar power is rapidly expanding as the leading source of renewable energy, with Japan holding the world’s highest installed capacity per square metre of land area. Wind power – offshore wind in particular is progressing and is expected to be a key factor in making renewable energy the main source of power in Japan.

We have invested as a limited partner in the Japan Energy Fund ("JEF"), a decarbonized energy fund established by ENECHANGE Ltd. ("ENECHANGE") and Loop Inc. ("Loop"), two emerging companies in the energy sector. The fund aims to promote a sustainable society by encouraging Japanese companies to invest in decarbonized energy projects abroad .

General Electric (NYSE:GE), has raised the largest* solar energy fund in Japan to invest in domestic solar power projects. Development Bank of Japan Inc. ("DBJ"), which used its renewable energy investing experience to help GE EFS structure the fund, has committed as the anchor investor for one third of the interests. The fund invests in .

Founded in August 2017, PHOTON CAPITAL is the operating company of an onshore fund specialized for solar power plants that focuses on investing in solar power plants in Japan. Why does Japan invest in energy projects?

By attracting investments in projects that could produce game-changing innovation, Japan apparently aims to gain an advantage in the global energy market and bolster its energy security.

What is Japan Energy Fund (Jef)?

Japan Energy Fund (JEF), an overseas-specialized decarbonized energy fund, was established by Enechange and Loop, two venture firms in the energy fields recognized as fast-growing and innovative. We invested in the fund as a limited partner.

Will Sumitomo Corporation group acquire additional solar power generation facilities in 2022?

The Fund plans to acquire additional solar power generation facilities in 2022. Sumitomo Corporation Group will continue to hold 50 percent of the shares of the two solar power generation companies and will continue to contribute to the promotion of renewable energy in Minamisoma city with SIC.

Will Japan bet on renewables?

It is not that Japan is unwilling to bet on renewables, given that the country plans to pour ¥20 trillion into them over the next decade — a figure that is much higher than the ¥7 trillion for ammonia and hydrogen as well as the ¥1 trillion for next-generation nuclear reactors.

How many GWP solar power projects are planned?

We expect to initially focus on developing an approximately 1 GWp solar power and 2.5 GWh BESS projects located across the southeastern and southwestern regions of the United States. We will continue to grow our footprint in the U.S. renewable energy market.

Is Japan's green strategy a good investment?

Skepticism will likely remain among investors, however, as Japan's green strategy has been seen more as an industrial policy aimed at boosting companies' competitiveness.
