Jersey solar power price inia

Overview

With solar, you're essentially acquiring an electricity generation facility for your property, meeting a portion of your future energy needs for many years to come. The average self-generated electricity unit costs around £0.10 over the system's lifespan, well below grid rates.

With solar, you're essentially acquiring an electricity generation facility for your property, meeting a portion of your future energy needs for many years to come. The average self-generated electricity unit costs around £0.10 over the system's lifespan, well below grid rates.

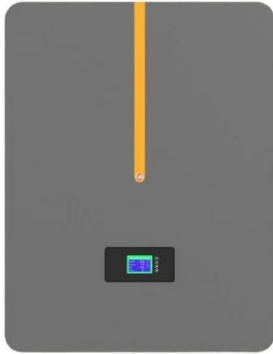

SunWorks have powered more homes with solar around Jersey than any other firm. We are Jersey's only dedicated PV provider so you can be sure of great service and the best suited PV system. 01534 498822 info@sunworks.je.

Solar photovoltaic (PV) systems are made up of panels that fit on top of your roof, but you can also install them on the ground or fit solar tiles. Solar PV cells are made from layers of semi-conducting material, usually silicon. When sunlight shines on the panels or tiles, electrons create a flow of electricity.

Batteries are an ideal way of capturing all the energy produced by the solar and stored electricity can be used throughout the night. The average domestic solar PV system is 4kWp and costs £5,000 - 8,000 (including GST at 5 per cent).

Harness the energy from our own domestic solar installation to power your home's appliances and heat your hot water with our unique Smart Solar offer, when switching to electric heating.
